## Gynecology Rapid Assessment Clinic Patient Information Sheet

Referring ED Physician: \_\_\_\_\_

Accepting Gynecologist: \_\_\_\_\_

Please proceed directly to the Obstetrics and Gynecology unit at Women's and Babies at St Catharines Site. The staff there are aware of your visit and are expecting you. Women and babies is located on the fourth floor. You will be registered and seen by the gynecologist on the same floor.

### **How to get there:**

The SCS is located at 1200 Fourth Ave, St Catharines. Scan the QR code for Google Maps directions.

Enter through the main entrance of the hospital (not the ED). Follow the floor line of blue tiles straight ahead to the main elevators. You do not need to stop at the main registration to the right of the main entrance. Take the elevators to the fourth floor, go to the right and straight following the signs to "Women and Babies".

Please bring your health card, medication list and a support person with you. It is always a good idea to have a book, a phone charger and entertainment for any kids. Your nurse will tell you if you are able to eat or drink before your appointment.

Thank you...
