

Acute Leukemia ED / Hematology Pathway

Acute Leukemia Referral Network

Hamilton Niagara Haldimand Brant Regional Cancer Program

This information is intended to provide important information for the consultation and referral of adults with suspected acute leukemia

Your partnering Acute Leukemia Service Site:

Hamilton Health Sciences - Juravinski Cancer Centre

699 Concession St., Hamilton, ON

Phone: 905-387-9495

All suspected acute leukemia patients should be evaluated by a local hematologist to determine the urgency of the case and management plan

- 1** Upon suspicion of acute leukemia, all patients should receive (if available):
 - ☐ Assessment of vitals, comorbidities, concomitant medications and allergies, performance status
 - ☐ Blood testing including:
 - Blood smear, CBC, coagulation tests (aPTT, INR), fibrinogen level, albumin, blood cultures (if febrile), blood smear, calcium, creatinine, electrolytes, lactate dehydrogenase (LDH), liver enzymes, magnesium, phosphate, uric acid
 - ☐ CT scan head if low platelet count and altered mental status
 - ☐ Transfuse platelets if bleeding or platelet count is <10
 - ☐ Transfuse packed red blood cells if hemoglobin is <70
- 2** Assess the criticality of the patient and determine an appropriate course of action. If required, contact your partnering Acute Leukemia Service Site to speak with a hematologist.
- 3** If referral is required, submit the following information within the referral package to the Acute Leukemia Service Site as instructed by the physician on-call.
 - ☐ Patient demographics (name, address, telephone number, health card, etc.)
 - ☐ Patient emergency contact information
 - ☐ Referring physician information
 - ☐ Admission, consult, and clinic notes (as available)
 - ☐ Testing and assessment reports detail above (section 1)

In collaboration with Acute Leukemia Service Sites, referring hospitals may be asked to provide supportive care for patients closer to home.

Cancer Care Ontario

Acute Leukemia Referral Network

Hamilton Niagara Haldimand Brant

Regional Cancer Program

Acute Leukemia Service Site (Hamilton Health Sciences - Juravinski Cancer Centre) is responsible for:

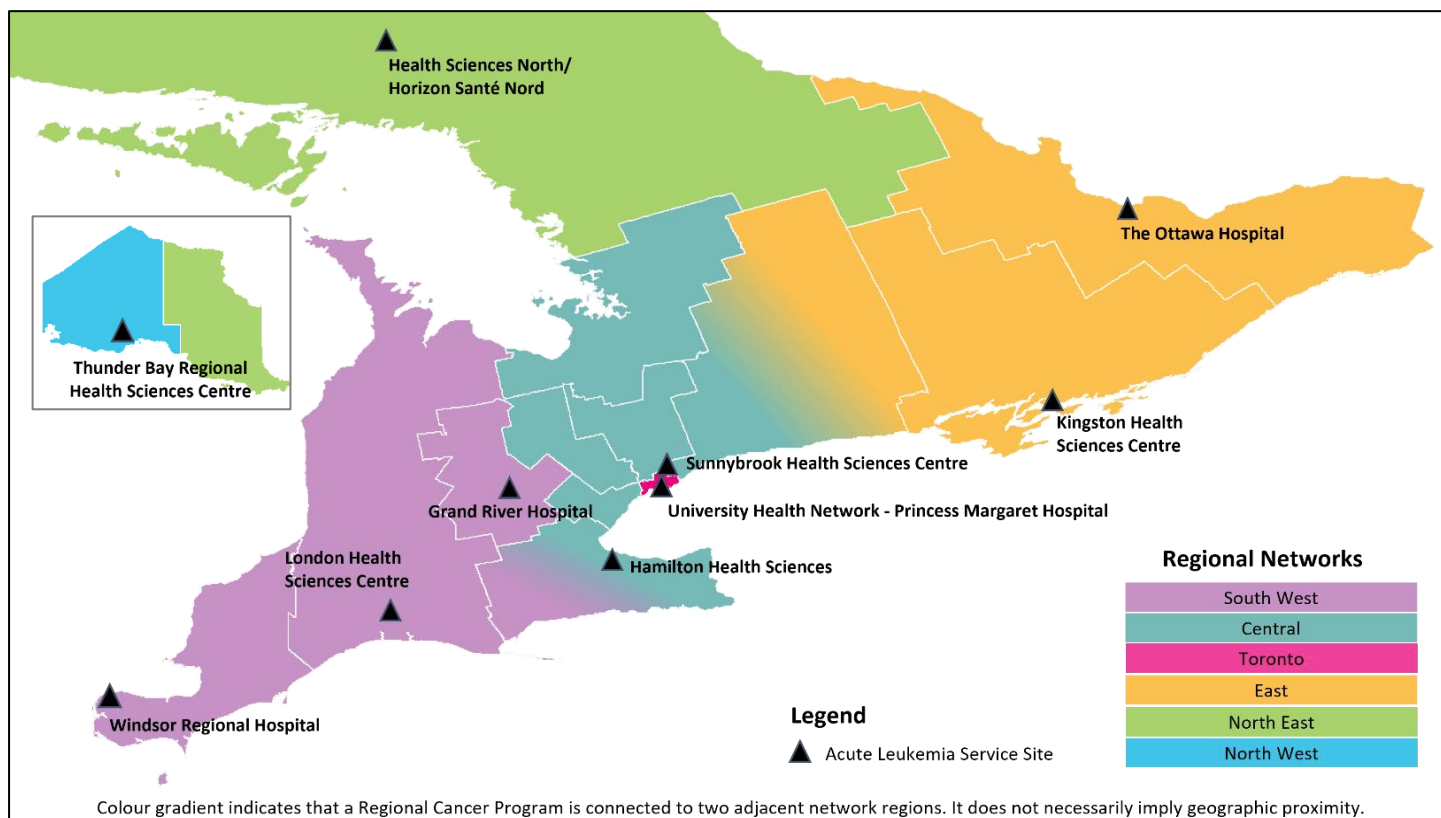

1. Receiving calls from referring hospitals in their region (and sometimes beyond).
2. Working with the referring hospital to review the case and determine a management plan for the patient based on the referring centre's initial assessment.
3. If the Acute Leukemia Service Site does not have capacity to manage the case in a timely manner (i.e., bed capacity, staffing shortages, etc.), the Service Site should assist the referring hospital by providing instructions on which Service Site to call next according to the ranked call order.

Notes:

- To facilitate care closer to the patient's home, Acute Leukemia Service Sites are encouraged to exhaust all local resources before turning away patients.
- Patient preference should be considered when making referrals.
