1.0 Purpose

To provide guidelines for the most appropriate admitting service for patients with specific presenting complaints and/or diagnoses. These are meant as guidelines, and not as inviolable rules.

2.0 Background

2.1 The intent of Admissions Guidelines is to support safe, quality care through admissions decisions based on the Most Responsible Physician (MRP) who can provide the right care for the patient at the right time.

2.2 NH complies with all relevant laws, regulations and professional standards and this policy and procedure must not be interpreted nor applied in any way that would violate regulatory requirements or compromise patient care.

2.3 These guidelines support, and is aligned with, the Niagara Health Purpose, Vision, and Values Policy, Professional Staff Codes of Conduct and related Policies and Procedures. It is not meant to replace the Consultant Coverage of the Emergency Department Policy, but is meant to complement and be used alongside the policy.

2.4 Disagreements between admitting services will be resolved following a standard escalation pathway.

DISCLAIMER: This is a CONTROLLED document for internal use only. A printed copy of this document may not reflect the current, electronic version on the Policy and Procedure site. Only documents viewed through the Policy and Procedure site are considered official. Permission is required from Practice and Education prior to sharing outside NH.

3.0 Scope

Applies to all Professional Staff with admitting privileges within Niagara Health.

4.0 Policy

4.1 Patients will be admitted to the most appropriate service under the Most Responsible Physician (MRP) that can provide the right care to the patient at that time. This will continue to be re-evaluated to support ensuring continued access to the right care at the right time.

4.2 The Emergency Department (ED) professional staff member will contact the MRP as outlined in the admissions guidelines and the MRP will be responsible for accepting and admitting the patient.

4.3 Any disagreements between admitting services should be resolved through self-resolution. ED professional staff are not responsible for mediating disagreements between Services.

4.4 For non-resolution, Services will follow the escalation outlined in 5.2 to resolve the issue around admitting service.

4.5 In the event of an escalation to Department Chief or Chief on Call, the decision made by the Chief or Chief on Call will be the decision at that time unless new information becomes available.

4.6 If a Professional Staff Member refuses to admit following the decision by the Department Chief or Chief on Call, this will be viewed as disruptive behaviour under the classification of refusing to work collaboratively and cooperatively in the delivery of quality patient care as per Physician Behaviour in the Professional Environment by The College of Physicians and Surgeons of Ontario (CPSO).

4.7 Refusal to admit a patient following a decision by the Department Chief or Chief on Call will be followed up with an automatic meeting scheduled the next morning with the Professional Staff Member, the Department Chief, and the Chief of Staff.

4.8 Repeated instances of refusal will be classified as such under CPSO Guidebook for Managing Disruptive Physician Behaviour.

5.0 Admissions Escalation Procedure

In the event of a non-resolution, the following will be the step-wise process to achieve a resolution with the primary guiding principle being the right care for the right patient at the right time.

5.1 **Step 1**:

a) All Professional Staff are encouraged to first attempt to resolve the disagreement through self-directed resolution.
b) If one of more parties feels that the resolution was unsatisfactorily concluded, then Step 2 should be implemented.

5.2 **Step 2**:

a) For the purpose of facilitating a resolution, the relevant Heads of Service will engage and attempt to resolve the disagreement between the physicians.
b) If one of more parties feels that the resolution was unsatisfactorily concluded, then Step 3 should be implemented.

5.3 **Step 3**:

a) If the Heads of Service were not able to resolve, the relevant Department Chief(s) during weekday hours or the Chief on Call during afterhours will be contacted to resolve the dispute.

5.4 **Step 4**:

a) After reviewing the case and the guidelines, the consulted Chief or Chief on Call's decision is considered final. This ensure that the patient is cared for right now and is not left without an MRP Service. If further information or a change in status occurs later, the case would be re-

evaluated and care can be transferred to the most appropriate Service in accordance with standard practice and policy. Patients who are unable to be discharged from the ED should not remain in the ED after completing their immediate emergency care and need an admitting MRP Service.

6.0 Definitions

Professional Staff means those Medical Staff, Dental Staff, Midwifery Staff and non-employed members of the Extended Class Nursing Staff that are appointed by the Board and who are granted specific Privileges to practice medicine, dentistry, midwifery or extended class nursing respectively.

Code of Conduct and Related Policies and Procedures refers to the policies related to codes of conduct for staff and affiliates including, but not limited to:
Professional Staff Code of Conduct -- Policy
Disruptive Professional Staff Members - Policy
Mutually Respectful Workplace and Diversity -- Policy and Procedure
Incident Reporting and Management – Policy and Procedure

NH patient: Refers to an individual who seeks care, laboratory or other investigatory testing in NH, community setting or a NH Affiliated Teaching site.

Appendix A
Guidelines for Admissions

NOTES:

1. Highlighted cells are those requiring additional conversations.

Assumptions

1) All GIM means GIM +/- Critical Care, depending on the patient's condition.
2) If a patient is unstable, the assumption is that Critical Care becomes MRP.
3) If someone is palliative, the assumption is that a discussion will have taken place before Medicine becomes MRP.

Guiding Principles

1) Safe, Quality Care: All decisions are made based on the Most Responsible Physician (MRP) who can provide the right care for the patient at that time.
2) Resolution of Disagreements: Disagreements should start with self-directed resolution between the admitting services identified below and follow the same basic principles for escalation as required. Emergency is not responsible for mediating disputes between other services.
    a. Self-directed resolution.
    b. Escalation to the relevant Heads of Service.
    c. Escalation to the Department Chiefs (Weekday Day Hours) or Chief on Call (Afterhours).
    d. Refusal to admit a patient based on the call of the Chief on Call will result in an automatic meeting the next morning with the Physician who has refused to admit, the Department Chief, the Chief on Call, and the Chief of Staff.
3) One system: Niagara Health is one team that serves the Niagara Region.
